

# 2022 Manufacturing Leadership Awards

## SAMPLE PROJECT NOMINATION FORM

This sample nomination form for the Manufacturing Leadership Awards can be used as a reference for gathering required information to complete an entry. **All nominations must be created and submitted at <https://manufacturingleadership.awardsplatform.com>.**

Each manufacturing enterprise may submit no more than five (5) project nominations per year. A company can win up to three (3) project awards per season.

Company name and project title are included in public awards announcements; each project nomination form must include a project title that is approved for public release. **All other information submitted on this nomination form is strictly confidential.**

### Section 1: Company Information

Full Company Name:			
Headquarters Address:			
City:	State/Province:	Zip/Postal Code	Country:
HQ phone:			
Website:			
Company Twitter URL:			
Company LinkedIn URL:			

Number of employees *(Please select one.)*

- 5,000 or more
- 1,000-5,000
- 500-1,000
- 100-500
- Less than 100

**Annual Revenues** (Please select one. Note: This information is kept strictly confidential and is only used in consideration for identifying small/medium enterprises and large enterprises for Manufacturer of the Year awards.)

- Over \$10 billion
- \$1 billion - \$10 billion
- \$500 Million - \$1 Billion
- \$100 Million - \$500 Million
- Under \$100 Million
- Confidential

**What does this company manufacture and what is its industry?** \_\_\_\_\_

**Are you submitting this nomination on behalf of another company, such as a customer or client?** (If yes, please provide your company contact information in the next field.)  Yes  No

**Partner Contact Information** (Contact at the technology partner or service provider facilitating this nomination, if applicable)

<b>Name:</b>	<b>Title:</b>
<b>Company:</b>	
<b>Phone:</b>	<b>E-mail:</b>

## Section 2: Project Contact Information

**Project Contact Information** (Primary project contact. This contact will receive award status notification e-mail.)

<b>Name:</b>	<b>Title:</b>
<b>Company:</b>	
<b>Phone:</b>	<b>E-mail:</b>

**Executive Sponsor Contact Information** (The executive-level individual at the manufacturing company who led sponsorship of the project. Contact must be VP level or higher.)

<b>Name:</b>	<b>Title:</b>
<b>Company:</b>	
<b>Phone:</b>	<b>E-mail:</b>

**Public Relations/Marketing Contact:** (Someone who can help get the word out about your award.)

<b>Name:</b>	<b>Title:</b>
<b>Company:</b>	
<b>Phone:</b>	<b>E-mail:</b>

**If your company has an Awards Coordinator, please list contact information below.**

**Awards Coordinator Contact Information:**

<b>Name:</b>	<b>Title:</b>
<b>Company:</b>	
<b>Phone:</b>	<b>E-mail:</b>

### Section 3: Nomination Category

Select the category for which you are submitting this nomination. (Please select one. See the final page of this application for [category descriptions](#). Note that the MLC editorial team has final decision on the appropriate category for each nomination.)

- Artificial Intelligence and Machine Learning
- Collaborative Ecosystems
- Digital Network Connectivity
- Digital Supply Chains
- Engineering and Production Technology
- Enterprise Integration and Technology
- Operational Excellence
- Sustainability and the Circular Economy
- Transformational Business Cultures

### Section 4: Project Information

1. **Project Title.** Please provide a title for this project that is approved for public release.
2. **Project Abstract.** Please provide a description of the project being nominated, including the reasons for the project's origin and the benefits it has delivered. (250 word limit)
3. **Project Timeline.** Please provide a list of key dates for the project's development, launch, and completion. Indicate phases still to be implemented, if applicable.
4. **Process Impact.** Describe how this project transformed a key process, improved performance, improved cost effectiveness, and/or created an entirely new dimension of value for the company. (400 word limit)
5. **Business Impact and ROI.** Describe how this project aided in the company's growth financially or relative to market share, reputation, or customer satisfaction, as well as project cost in terms of financial or other resources, the hard and soft benefits realized, and if possible financial returns and metrics on specific process improvements. (400 word limit)
6. **Strategic Impact and Scale.** Describe how this project helped advance the company's long-term business goals, further its digital transformation, and/or expand its future growth opportunities, as well as the project's scale or potential scale across the company's operational footprint. (400 word limit)
7. **Achievements and Innovation.** Describe how the project improved the company's competitiveness or allowed it to deliver and realize greater value, as well as what was innovative about this project or its outcome. Include any additional recognition through other awards programs, industry groups, institutions, etc. (250 word limit)
8. **Supporting Technologies.** Please list the key technologies and services, if any, that were used to support this project. (Examples: design/development applications such as CAD, PLM, simulation/visualization; enterprise applications software such as ERP and CRM systems; IoT platforms; control/automation systems; networking and communications technologies; data/analytics applications; advanced robotics; professional services, etc.)

## 2022 Project Category Descriptions

**Artificial Intelligence and Machine Learning** - Winners in this category demonstrate innovative utilization of AI and/or machine learning to achieve performance and process improvements. They achieve better planning, make predictive insights, increase agility, and improve quality through using data and advanced analytics for a competitive advantage.

**Collaborative Ecosystems** – This category recognizes organizational efforts at utilizing M4.0 technologies to enhance internal and external cross-functional collaboration to boost productivity, satisfy customer requirements, accelerate innovation, or achieve greater speed and agility. They create corporate structures and policies that support a collaborative enterprise and develop effective strategies to further its growth.

**Digital Network Connectivity** – Winners in this category improve their production [perhaps remove the supply chain reference here. This one seems pretty much focused on operations and supply chain is covered in the next category]and supply chain processes through enhanced connectivity of plant equipment to enable more timely maintenance, operations, and quality. They utilize high-powered ethernet, 5G, or WiFi networks along with technologies like cloud or edge computing to enable machine-to-machine communications, allowing for data acquisition, improved cybersecurity, predictive maintenance, and other business benefits.

**Digital Supply Chains** – This category honors those who have created resilient, agile, responsive supply networks that are flexible and responsive. Winners in this category have developed strategies for predicting and minimizing disruptions, while also rethinking and reengineering how they source materials, manage suppliers, deliver products, and service customers. They demonstrate efficiency in managing the overall value chain and maximizing customer value.

**Engineering and Production Technology** – Winners in this category embrace new design and production approaches to drive game-changing process improvements. They adopt technologies such as advanced 3D modeling and simulation, sensor networks, advanced materials, process automation platforms, advanced robotics, and additive/3D printing for production applications. Winning projects improve efficiency and quality, increase responsiveness, and reduce costs.

**Enterprise Integration and Technology** – Winners in this category demonstrate innovative corporate IT and communications strategies and systems, embracing approaches such as edge/cloud computing, advanced enterprise software applications, and mobility platforms. Winning projects enable agile business processes that manufacturers can use to better manage and deliver products and services. They also serve as an example of how transformative technologies can contribute to the development of the manufacturing industry in the future.

**Operational Excellence** – Winners in this category implement continuous improvement projects and harness M4.0 technologies and processes to reduce costs, streamline processes, reduce waste, improve quality, and enhance overall equipment effectiveness. Winning projects demonstrate commitment over time, measurable results, and enhanced performance of the organization as a whole.

**Sustainability and the Circular Economy** – Winners in this category have made significant progress in embracing manufacturing processes that minimize pollution, conserve energy and natural resources, and are economically and environmentally safe and sound for employees, communities, and consumers. They undertake Net Zero initiatives, seek innovative methods for product and materials reclamation, and show a broad and deep commitment to sustainability through product design and end-of-life strategies, meaningful metrics, and/or sustainable practices both internally and across supply networks.

**Transformational Business Cultures** – This category honors organizations that have reimagined traditional manufacturing organizational cultures to create one that is agile, empowered, diverse, and data-driven, with demonstrated leadership in employee recruiting, retention, and/or engagement. Winners in this category encourage decisions at the lowest level possible, demonstrate excellence in employee upskilling and reskilling, and cultivate a mindset of flexibility and ownership among the workforce.
